

## ADVANCED – TRAIN THE TRAINER

- Course suited for managers nominated spill responders or Environmental/HSE Managers.
- The training meets all Environmental Agency, DEFRA and ISO14001 requirements and shows the impact a spill can have on the local environment and water courses.
- The course takes approximately 4 hours - breaks will be provided.
- A two-part classroom Power-point presentation will include; recognising what level of response for emergency spills and thereby help to reduce corporate exposure to risks of polluting the environment, consequent costs and staff safety during this process.
- Improve the knowledge and understanding of the physical dangers of spillages, typical routes of escape from the site and how to use containment and absorbent products to effectively control a spill for in-house staff.
- To create awareness of individuals' moral and legal responsibilities for causing pollution within the water environment.
- A practical 'dry' demonstration is carried out using the 'Train The Trainer' spill kit to show staff what is typically contained in the spill kit or absorbent station and which order to use the components with a typical or complex spill.

### Emphasis is placed on the three golden rules

1. Identify the product spilled and select appropriate PPE or help
2. Secure the entire spill area to reduce the risk of slip accidents
3. Cover any vulnerable drains as a priority

### Theory

- Training Goals
- Spill response products – types, users and deployment
- Application guide
- Know your spill kits
- Spill practise & procedures
- Spill Responses Planning Advice
- Handling a spill
- Environment and duty of care
- Health and safety of response personnel
- Pollution legislation
- Awareness of liquids and chemicals
- Spill response actions - containment, clean up and disposal
- After spill analysis/reporting procedures
- Preparing/Planning safe spill drill exercises
- Power-point workings
- Confidence gaining with training delivery

Provided on Behalf of PKSafetyUk by Fentex Limited as part of the Fentex S.T.A.R. Training program.

## Practical

- Spill kit locations, types and contents
- Simulated spill exercise
- Deployment techniques for spill response products
- Spill Knowledge quiz

## Training Stipulations

- Each course can accommodate up to 6 people (all delegates to provide their own standard PPE)
- Certificates will be produced from attendance list signed on the day by delegates, training manuals provided
- 2 courses can be run in one day
- Site requirements, inside room made available with table and chairs, on-site TV link for trainers' computer and safe space made available in yard for practical demonetisation, either indoors or outdoors weather permitting.
- Items provided for future use all ie: Trainers Demonstration Spill Kit Bag, Power-point, training brochures, refills, PDF files or hard copies will be chargeable, POA

Depending on the location and amount of courses booked, accommodation and travel expenses may be added to the total cost on a POA basis. Late cancellations (within 7 days of training date) will incur a charge of up to 100% of the total cost of any training course/courses booked.
